(54) Title: METHOD FOR PRODUCING LOGS OF WEB MATERIAL AND REWINDING MACHINE IMPLEMENTING SAID METHOD

(57) Abstract: A method for producing logs (L1, L2) of web material (N) wound around tubular cores wherein the tubular core (A1-A4) is equipped with glue to secure the initial end of the web material and allow winding. Part of the glue applied to the tubular core is transferred to the web material (N) before it is severed upon termination of winding the log, to seal the final free end of the formed log.
